PROFESSIONAL PROFILE

Early-career data analyst with hands-on experience cleaning data, writing SQL, and building Power BI dashboards during a analytics internship. Microsoft-certified (PL-300), Python Institute certified (PCAD) and Oracle SQL certified (1Z0-071). Backed by a 14-project portfolio spanning SQL, Power BI, Python, and Excel — including fraud analysis across 6.3 million payment records. Studying BSc Accounting and Finance and looking to move into a junior or associate data analyst role, turning data into clear, decision-ready insight.

TECHNICAL SKILLS

Querying & languages: SQL (joins, subqueries, window functions, CTEs, views), Python (pandas, NumPy, Matplotlib)
BI & visualisation: Power BI (DAX, data modelling, row-level security), Excel (PivotTables, lookups, conditional formatting)
Data analysis: Data cleaning, data validation, exploratory analysis, dashboard design, KPI and stakeholder reporting
Strengths: Attention to detail, problem solving, organised, efficient time management

CERTIFICATIONS

• PL-300: Power BI Data Analyst Associate — Microsoft	Sep 2025
• 1Z0-071: Oracle Database SQL Certified Associate — Oracle	Mar 2026
• PCAD: Certified Associate Data Analyst with Python — Python Institute	Aug 2026

WORK EXPERIENCE

Data Analytics Intern — Ededge Group, Remote (UK)

Oct 2025 – Jan 2026

- Cleaned and structured datasets in Excel using PivotTables, lookups, conditional formatting, and data validation to build consistent reporting templates and quality checks.
- Built interactive Power BI dashboards with clear KPIs and drill-down analysis, creating DAX measures and model relationships.
- Wrote SQL queries using joins, subqueries, and GROUP BY/HAVING to extract, join, and aggregate data into reusable reporting outputs.
- Turned recurring reporting needs into reusable templates and documented quality checks, so outputs stayed consistent and could be rerun without rework.

PROJECTS

Four of 14 projects — all with full write-ups and code at viorel-portfolio.uk

- **Payments Fraud Detection — SQL (Oracle)** — End-to-end analysis of 6.3 million payment records; wrote queries with joins, subqueries, and aggregations to isolate and flag anomalous transaction patterns.
- **Automobile Sales During Recession — Python** — Exploratory data analysis with pandas and Matplotlib, comparing sales behaviour across recession and non-recession periods.
- **Sales & KPI Dashboard — Power BI** — Interactive dashboard built on a modelled dataset with DAX measures and drill-down views for performance tracking.
- **Product Listings Web Scraper — Python** — Scraped live e-commerce listings with requests and BeautifulSoup, parsing structured product data for analysis.

PROFESSIONAL DEVELOPMENT

• Data Analysis with Python and Pandas	Jun 2026
• Microsoft Power BI Data Analyst	Jul 2025
• IBM Data Analyst	Jun 2025
• The Advanced SQL Server Masterclass for Data Analysis	Jun 2025
• Data Analysis: SQL, Tableau, Power BI & Excel	Dec 2024
• Business Analyst Bootcamp: Excel, Stats, SQL, Tableau	Nov 2024

EDUCATION

BSc Accounting and Finance — Arden University, Birmingham (UK)

Sep 2024 – Sep 2028 (in progress)

- Relevant modules: Quantitative Methods for Accounting and Finance; Financial Technology.

Romanian Bacculaureate (equivalent to UK A-Levels) — Theoretical High School of Mathematics and Computer Science, Romania

2009 – 2013
